

At DiStefano, we guarantee patient satisfaction with all of our hair transplants. Approximately 92-95% of all the transplanted hair is expected to grow. If a patient, after completing an in person follow-up visit at 9 and 15 months, is unsatisfied with his or her hair transplant we pledge to replace any graft that did not grow at no charge to the patient. We have less than two percent of patients each year who redeem this guarantee. The vast majority of patients are very pleased with the results. You will also need to be taking Propecia, if that is recommended, in order to qualify for this agreement.

Sincerely,

Mark S. DiStefano, M.D.
